

## BUILDING SCIENCE CO-OP STUDENT

### What You'll Be Doing

As a Building Science Co-op Student, you'll be part of a friendly team of engineers and technologists who support each other and grow together. You'll get hands-on experience with projects that focus on building envelope restoration and commissioning. Here's a look at what your role might include:

#### Restoration Projects

- Help the project engineer with investigations, assessments, and design work
- Assist with writing specs and design documents
- Work closely with teammates and external partners to keep projects on track
- Review contractor submissions and visit construction sites to check progress and quality
- Track and document repairs and write up field reports

#### Building Envelope Commissioning Projects

- Get involved with commercial, institutional, and multi-unit residential buildings
- Help with planning, reviewing drawings and specs, coordinating meetings, and testing
- Collect and organize maintenance and closeout documents
- Do site visits and inspections

### What We're Looking For

We're always learning and pushing each other to do better. If you're someone who's curious, collaborative, and ready to dive in, here's what we'd love to see:

- Working toward a diploma in Civil Engineering Technology
- Any hands-on experience with building envelope systems is a bonus
- A team player with strong communication skills—both in person and online
- Comfortable using Microsoft Office
- Physically able to work on construction sites in different conditions
- Legally allowed to work in Canada and able to pass government security checks

#### JOB DETAILS

<b>Location:</b>	Winnipeg
<b>Hours:</b>	Daytime Hours, Monday to Friday
<b>Job Type:</b>	Full-time, in-office position
<b>Application Deadline:</b>	Open
